

Floor

GRAPHICS

Bring your customers to a halt right at Point of Sale. Our floor decals are digitally printed and laminated with a non-slip film. We also use a removable adhesive suitable for tiles, concrete and carpet applications.

Your brand exposure is enhanced with floor graphics being widely used for product awareness and promotions. With limited marketing space available high impact floor graphics are very popular and a great place to display your message. They can catch the attention of potential buyers and influence the buying process at the point of purchase or give your company exposure in retail stores and at major events.

With 3D graphics that really draw attention, give your message maximum impact and are very versatile allowing floors to be a great place to promote in-store specials, directional floor graphics, logos at sporting events or draw attention to special products in retail stores. We can create your own unique floor graphics and set a new standard in POS that comes in all shapes and sizes.

Our state-of-the-art Sydney workshop and our team of artists enable us to create artwork and manufacture signage right here on site, saving you time and money.
