

Classic double sided BANNER

The Classic Double Sided Banner display features a smart silver finish, slim base unit for a “designer” feel. Can be single or double sided allowing you to double your impact by using both surfaces to present your message. Ideal for reception areas, point-of-sale, instant presentations and trade show banner stands.

Double-sided banner stands maximize your advertising by providing twice the impact while using the same amount of space. The stand allows visibility from either side and gives the opportunity to display two graphics back to back.

Each unit comes with its own padded carry bag.

The 25mm rail lip allows very good print to rail adhesion.

All elements have their own compartments in the padded carry bag.

Long stable footers display fantastic support for this unit.
